

Our Mission

Our Mission is to deliver products, systems and services of the highest quality, safety, reliability, maintainability and durability to our customers, on time, every time.

Quality Policy

Allied Uniking Corporation, Inc. aspires to be recognized as the leading supplier in the industries it serves by providing sound solutions to customer problems by engineering, manufacturing and installing quality equipment at competitive pricing. In 2001, a decision was made that in the spirit of continuous improvement, it was no longer sufficient to "meet the customer's requirements" and the ensuing connotations of meeting the minimum requirements. Instead the management team requested that the Quality policy be modified to in a way that they felt would "raise the bar".
The New Quality Policy of Allied Uniking Corporation, Inc. is:

"Every employee will constantly strive to prevent defects and perform work correctly the first time, by understanding and meeting the expectations of our customer."

This policy has been communicated to all employees and is displayed throughout the company.

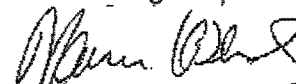

To this end, we have established the following objectives for the Allied Uniking Corporation, Inc. (AUC) Quality Assurance Program:

- (a) Reduce the occurrence of rework;
- (b) Increase Employee Training, Awareness and Participation in order to achieve a Quality product in a safe and environmentally sound manner ;
- (d) Deliver defect free products, on-time, every time;
- (e) Increase the reliability, maintainability and durability of our products; and
- (e) Increase customer satisfaction, both externally and internally.

In pursuit of our company objectives, AUC has implemented and maintains this Quality Assurance Program based on the requirements of ISO 9001:2000 and the Tooling and Equipment Supplement. The Quality, Environmental & Safety Manager is responsible for ensuring that the Quality Program is implemented and properly maintained and has the authority and organizational freedom to identify quality problems, to initiate action, which results in solutions, and to verify the implementation of these solutions.

This Quality Assurance Program is to be implemented by Management on all projects executed by AUC. Managers within the Company have the full authority and the responsibility for implementing this Quality Assurance Program within their respective departments or project organizations. AUC has a never-ending commitment to continuous quality improvement and each individual employee contributes towards this goal. It is every employee's responsibility to be familiar with and follow the requirements of this Quality Assurance Program.

Allied Uniking Corporation, Inc.
